

## **Petivity**

Crystal Z., Ivan S., Sidra I., Jonathan M.  
README FOR PETIVITY WEB AND MOBILE

### **Web/Google Chrome Extension**

#### **LIMITATIONS:**

- Web and mobile are not capable of actually syncing and recording blocking time from mobile in web blocking calendar
- Self-care suggestions are supposed to be AI-generated (but aren't)
- Cannot add/edit calendar events (linked to one of our Google Calendars)
- Refreshing the page causes the whole application to reset (changes are not persistent)

#### **OPERATING INSTRUCTIONS:**

- Click the menu button in Google Chrome (usually 3 dots on right-hand side)
- Hover over "More Tools" to select and then click "Extensions" from the hovered pop-up
- The extensions page should open up and you should click the checkbox next to "Developer Mode" found on the top right-hand side to enable it
- Click the "Load Unpacked Settings..." button found on the left-hand side and a pop up should show up for you.
- Find and select the folder where your extension files are stored in the pop-up
- Once you select your files, and click ok, you should see "Petivity" loaded on as an extension on the page
- Click the checkbox next to "Enabled" to enable the extension
- Open a new tab to see Petivity and start using it

### **Mobile**

#### **INSTALLATION:**

Petivity's interface was designed to be presented using iPhone 6s screen size dimension (138.3 x 67.1mm-), although it should be functionally compatible across iPhones. If you have a compatible phone, download Expo mobile application and scan the QR code contained within the following link: <https://exp.host/@czheng11/mobile-app>

#### **LIMITATIONS:**

- Web and mobile are not capable of actually syncing and recording blocking time from mobile in web blocking calendar

#### **OPERATING INSTRUCTIONS:**

- User can decide to sync or to skip syncing. The correct mobile syncing code is in the google-chrome plug-in under the sidebar of Calendar.

- User taps pet to navigate to blocking screen where user can operate blocking timer, after starting, pressing stop or navigating off the screen will stop the timer.
- User can play with mango treat and feed pet by dragging mango to pet.
